

### **ABOUT** US

We are one of the young and energetic organisations of India, having a vision of decentralizing the total transaction system of the Earth. We started nearly our journey into this industry long back. However incorporated in the year 2021. We have already completed complicated projects for our Global clients. We are a team consisting of 26 developers and having inbound tie ups with our allied organisations of repute. We also provide consultation on hybrid projects and system mixes. Our mission is to work on long term projects and automate the complete transaction system.

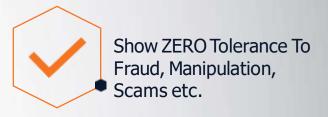

**Decentralize Every Transactions** 

Save Huge Transaction Cost

Secure Transaction

Do Immutable **Transactions** 

Do Transaction In Fraction Of Unit Of Time (Time Saving)

Say Goodbye To Centralized Authorities

Saving Huge Traditional Inefficient Manpower.

## **OUR SERVICES**

Ethereum Smart Contract Development

BSC Smart Contract Development

Maticsmart Contract Development

Smart Contract Unit Testing

Smart Contract Integration

Open Zeppelin Contracts

Truffle

Remix

Solidity

Drizzle

ICO

IDO

Staking

Farming

**IPFS** 

**Oracles** 

Uniswap/ Pancakeswap

Algorithms

Verified contract address

Pancake swap

Liquidity Pool

Lock Liquidity Pool

Create Token Economics

Create Presale For That New Coin/Token

## **JUST** AUTOMATE

A **Smart Contract** is a self-executing contract with the terms of the agreement between buyer and seller being directly written into lines of code. The code and the agreements contained therein exist across a distributed, decentralized blockchain network.

## TRADITIONAL CONTRACT

### **SMART** CONTRACT

#### A Contract Process with Smart Contact

- 1. A Contract to Buy
- 1. A Contract to Sell
- 1. A Contract to Invoice Goods Sold
- 1. A Contract to Receive Goods

#### Process

- 1. No Legal Spend
- 1. No lawyer to Draft the Contract
- 1. No Third Party Involvement
- 1. No Authority
- 1. Every Step is Cryptographically Encoded and Gets Executed Automatically

#### Outcome

- 1. Better Contract Execution
- 1. Complete Control
- Increased Visibility in Terms of Search, Retrieval and Management
- 1. Boost Compliance

ITEMS =	7	BLOCKCHAIN ≜	IOT The state of t	
System Structure	$\odot$	Decentralized	Centralized	×
Resources	$\odot$	Resource Consuming	Resource Resticted	×
Privacy	$\odot$	Ensures The Privacy Of The Participating Nodes	Lack Of Privacy	×
Latency	$\odot$	Block Mining Is Time Consuming	Demands Low Latency	×
Scalability	$\odot$	Scale Poorly With A Large Network	Iot Considered To Contains A Large Number Of Devices	×
Bandwidth	$\odot$	High Bandwidth Consumption	Iot Devices Have Limited Bandwidth And Resources	×
Security	$\odot$	Has Better Security	Security Is One Of The Big Challenges Of Iot	×

# IS DATA ENOUGH? A COMPARISON BETWEEN BLOCKCHAIN &

## **DATABASE**

No one has the central authority

Selected groups of individuals have authoritative control

Modifying data or asset is nearly impossible

Data or assets can be easily changed

All the data or activity is out in the open for everyone to see

All the data or transactions are hidden from each other

Cuts down in the excessive costing

Implementing process is costly

Blockchains are slow

Database are comparatively faster

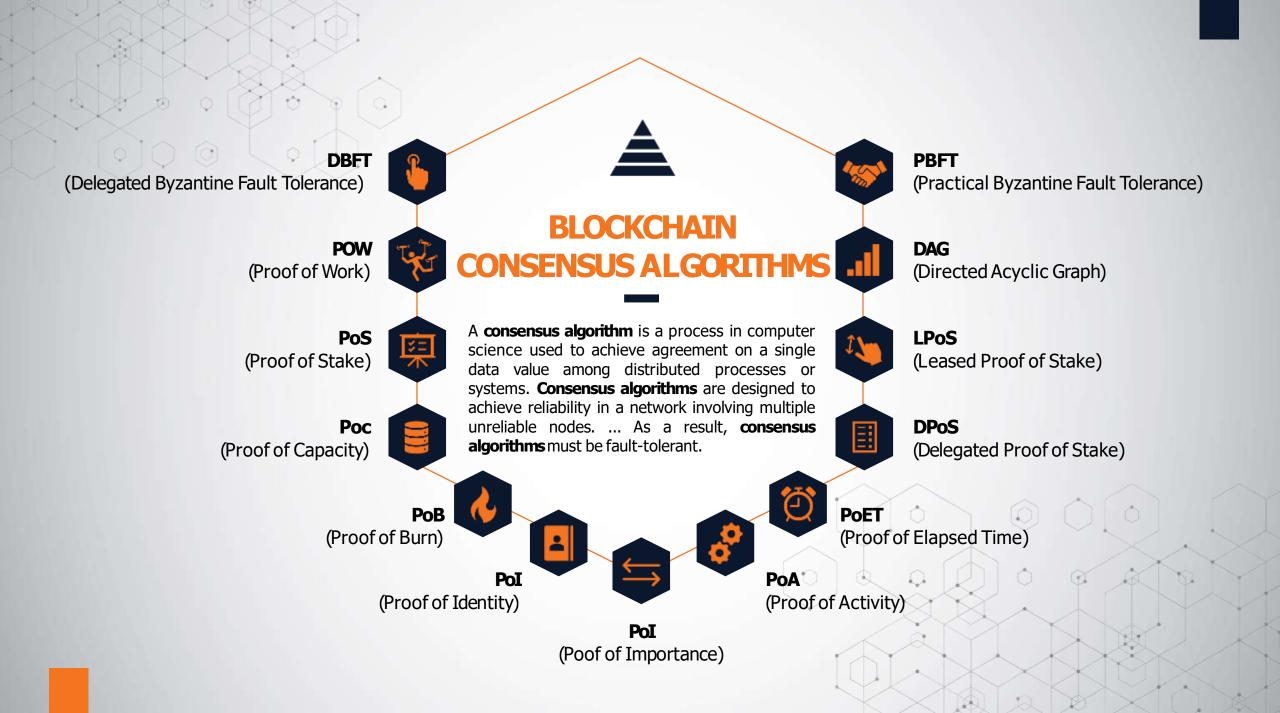

Suited for an organization where users don't trust each other

Suited for an organization where there is mutual trust

## TAG TEAM PROJECTS

We have **legal tie ups with our clients**, therefore we are unable to disclose ALL those projects in this list.

Near about 27 projects has been done, and about 70+smart contracts has been made on production.
